

Program 7: Creating a Simple Gradle Project.

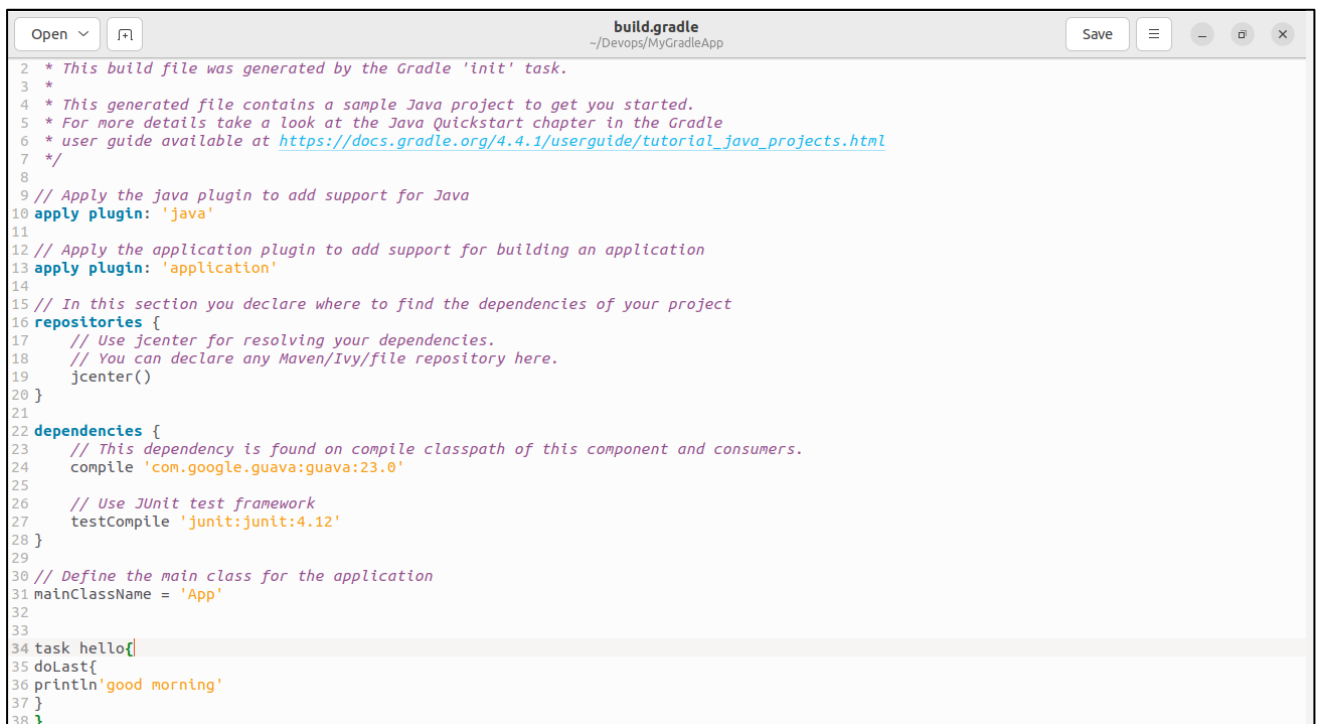

Step 1:

Create a directory in Devops called **MyGradleApp** , go to the directory and execute the command **gradle init --type java-application**

```
rakshith@rakshith-VirtualBox: ~/Devops
rakshith@rakshith-VirtualBox:~$ cd Devops
rakshith@rakshith-VirtualBox:~/Devops$ mkdir MyGradleApp
rakshith@rakshith-VirtualBox:~/Devops$ cd MyGradleApp
rakshith@rakshith-VirtualBox:~/Devops/MyGradleApp$ ls
rakshith@rakshith-VirtualBox:~/Devops/MyGradleApp$ gradle init --type java-application
Starting a Gradle Daemon (subsequent builds will be faster)
BUILD SUCCESSFUL in 12s
2 actionable tasks: 2 executed
```

Step 2: Display The **build.gradle** in text editor

```
build.gradle
~/Devops/MyGradleApp

2 * This build file was generated by the Gradle 'init' task.
3 *
4 * This generated file contains a sample Java project to get you started.
5 * For more details take a look at the Java Quickstart chapter in the Gradle
6 * user guide available at https://docs.gradle.org/4.4.1/userguide/tutorial\_java\_projects.html
7 */
8
9 // Apply the java plugin to add support for Java
10 apply plugin: 'java'
11
12 // Apply the application plugin to add support for building an application
13 apply plugin: 'application'
14
15 // In this section you declare where to find the dependencies of your project
16 repositories {
17     // Use jcenter for resolving your dependencies.
18     // You can declare any Maven/Ivy/file repository here.
19     jcenter()
20 }
21
22 dependencies {
23     // This dependency is found on compile classpath of this component and consumers.
24     compile 'com.google.guava:guava:23.0'
25
26     // Use JUnit test framework
27     testCompile 'junit:junit:4.12'
28 }
29
30 // Define the main class for the application
31 mainClassName = 'App'
32
33
34 task hello{
35     doLast{
36         println'good morning'
37     }
38 }
```

Step 3: Now build using the command **gradle build**

```

rakshith@rakshith-VirtualBox:~/Devops/MyGradleApp$ gradle build

BUILD SUCCESSFUL in 13s
17 actionable tasks: 7 executed

```

Step 4: Display the New Tree

```

rakshith@rakshith-VirtualBox:~/Devops/MyGradleApp$ tree
.
├── build
│   ├── classes
│   │   └── java
│   │       ├── main
│   │       │   └── App.class
│   │       └── test
│   │           └── AppTest.class
│   ├── distributions
│   │   ├── MyGradleApp.tar
│   │   └── MyGradleApp.zip
│   ├── libs
│   │   └── MyGradleApp.jar
│   ├── reports
│   │   └── tests
│   │       └── test
│   │           ├── classes
│   │           │   └── AppTest.html
│   │           ├── css
│   │           │   ├── base-style.css
│   │           │   └── style.css

│           │   ├── output.bin.idx
│           │   └── results.bin
│           └── TEST-AppTest.xml

```

Step 5: Execute gradle run

This execute the gradle task

```
rakshith@rakshith-VirtualBox:~/Devops/MyGradleApp$ gradle run
```

```
> Task :run  
Hello world.
```

```
BUILD SUCCESSFUL in 1s  
2 actionable tasks: 1 executed, 1 up-to-date
```

Step 6 : Execute gradle hello to run an specific task specified in the build.gradle file

```
rakshith@rakshith-VirtualBox:~/Devops/MyGradleApp$ gedit build.gradle  
rakshith@rakshith-VirtualBox:~/Devops/MyGradleApp$ gradle hello
```

```
> Task :hello  
good morning
```

```
BUILD SUCCESSFUL in 1s  
1 actionable task: 1 executed  
rakshith@rakshith-VirtualBox:~/Devops/MyGradleApp$ gradle run
```

```
> Task :run  
Hello world.
```

```
BUILD SUCCESSFUL in 1s  
2 actionable tasks: 1 executed, 1 up-to-date
```
